WHY ALLUMINIUM ?

Maintenance Free :

Alluminium is such a durable material that it lasts for decades, hence reducing overall reconstruction and maintenance expense. The systems are developed for multiple usage without hassle and they do not require any after-repairs.

Durability And Longevity :

There are many factors that make alluminium doors and windows more durable, versatile and long lasting. Light weight frames, precise installation process, weather resilience, resistance to wear & tear and others make them the ultimate choice for contemporary architecture. They are a great benefit to mother earth, as they are recyclable and powder coating is done through the eco-friendly ratings.

Variety :

The inherent strength and flexibility for aluminium to be manufactured to exacting specifications, means you are limited only by imagination. With an endless array of systems, finishes and glass options, aluminium offers a vast range of possibilities from the economical to most elaborate systems while also delivering excellent thermal performance.

Modern & Contemporary Designs :

Aluminium frames are thin, sleek and eye-catching. One main key is to achieve that desired modern look is bringing the outside to the inside through the large expanses of aluminium doors and windows. They come in various proportions, styles, color palettes and multiple systems, that can add luxury and style to the Architectural Vocabulary.

Performance :

When combined with energy efficient glass, aluminium windows are able to meet or exceed energy efficiency standards by providing excellent thermal and sound insulation thus easily outperforming more expensive wood and PVC counter parts. Aluminium windows can easily achieve a significant boost in heat gain and loss through windows by nearly 60%. They are also an environmentally sustainable material with one of the highest recycling rates of any metal.

WHY ?

Premium Quality Range Of Doors And Windows :

We bring to you the exclusive range of products, which are precisely designed keeping in mind the contemporary Indian needs and requirements. This range offers efficiency, durability, low maintenance and adds beauty to the architectural spaces.

Versatility At Its Best :

This range proves to be versatile and multi-functional that can be optimized for various projects. This range is efficiently viable for Apartment Flats, Private Villas, institutes, Corporate Offices, Luxury Spaces like Resorts, Hotels or Restaurants and many more. This range is meant for better aesthetical experience.

Handcrafted Custom - Made Solutions :

With high end technology at our side, we are coming up with tailor made architectural & interior design solutions catering to all types of functions & needs. Our mechanism allow multiple designs in an individual system, making it an innovative solution for all designers, developers and users.

Reinventing Architectural Vocabulary :

Our ultimate goal is to provide an X-FACTOR to our every building project. Our products can add charm to the elevations and can increase the beauty of the built mass. Our strength is the precision in manufacturing as well as in installation process and this precision can make the language of the building extraordinary.

Look - Feel - Buy :

Our brand had always been known for its customer satisfaction and after sale services. Our latest display venture brings us more close to designers as well as clients, where they can look at our products, feel it and then make the right decision. Our designs are not only on papers, they are reality.

Long Living Systems :

At CARA, we have designed keeping in mind the Indian needs, climate and economy. These systems are the most viable solution as they are cost effective and eco-friendly. These factors are responsible for our longevity and durability of the doors and windows.
