

Website Maintenance

After the website is developed it needs to be maintained on a periodic basis, so that, visitors can come across new data of a business organization, every time they visit the website. A poorly updated website is almost similar to the situation of having no website, because such websites often doesn't make a good impact on the visitors. So the ultimate solution is to update your website on a periodic basis. We offer different website maintenance packages which suits the requirements of frequent updations and not so frequent updations.

Our Website Maintenance Services

Fast

We are available to you via email or phone for taking your requests. We have a commitment to a two business day turnaround on any task two hours or less, and we usually get those tasks done same day.

Proactive

Websites require regular updates or maintenance. When critical in nature – such as a security patch or a version update, this work is done immediately. Non-critical items are presented as a ticket for your approval prior to work being completed.

Knowledgeable

We hire technically skilled and proven web developers. We've vetted out all of our staff so that you don't have to worry about the level of knowledge or capability. Should you have a unique maintenance need, we can most likely meet it.

Friendly

We hire nice people that are easy to talk to. To add to that, you have access to the entire team. If an issue arises that requires we pull in additional resources.

Accountable

We treat your time like the money it is and carefully tend to it. Bankable hours, online ticketing system, time tracking system and easy terms make Parker Web highly accountable for your investment.

Ongoing Support

Our team will always be associated with you, even after the website is made live. We will provide high-quality technical support if they face any problems with the website or if any updations are required.
